Message BIG THINGS ARE HAPPENING! Update: Here is what we know right now. President Trump has court cases still pending that will go to the Supreme Court. Thanks to Texas, he now knows how to file it under article 3 and not under article 2. This will force the Supreme Court to hear this rewritten case. President Trump has the Director of National Intelligence (DNI) report. It was announced as a late submission. Barr has stepped down on the 23rd, so he is now able to be a witness. It was not able to be announced until now. Durham is now a special counsel. He can prosecute in any state, all Biden's! He is allowing the civil, criminal, and federal courts to fail. Why? So he is able to handle the situation properly, using the military tribunals. President Trump has all the data from NSA, the Kraken supercomputer, the Alice supercomputer, and other systems most are not familiar with. He has the dueling electors from 7 state legislatures. He has VP Mike Pence as the final arbiter of ballots to accept on 1/6/20. He has the Insurrection Act (see below in a previous post), the National Defense Authorization Act (NDAA) Emergency Act, the 14th Amendment, the 2018 Executive Order allowing for the rejection of the election based on Foreign Interference, which we now know is true. He has January 27, 2017, the very first President Trump Executive Order, the Patriot Act, the FISA warrants, the possible Declassification of EVERYTHING, including Wikileaks. President Trump has 1000 people swear affidavits, the QR code scan personnel who just needs access
